The time period for reply, if any, is set in the attached communication.

Office Action Summary

Application No.

10/753,089

Applicant(s)

LUO ET AL.

Examiner

Paul Marcantoni

Art Unit

1755

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 10/31/2007 amdt and response.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1,4-11 and 25-27and 28 is/are pending in the application.
- 4a) Of the above claim(s) 25-27 is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1,4-11 and 28 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☒ Claim(s) 1,4-11 and 25-28 are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- Replacement-drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☐ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☒ Information Disclosure Statement(s) (PTO/SB/08)
Paper No(s)/Mail Date _____.

- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date. _____.
- 5) ☐ Notice of Informal Patent Application
- 6) ☐ Other: _____.

Art Unit: 1793

Applicant's RCE and arguments filed 10/31/07 have been fully considered but they are not persuasive.

Between About:

As stated for the reasons in the previous office action, "between about" has been interpreted to mean the same as --about--.

ODP Rejection:

Claims 1 and 4-11 and 28 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over all claims of U.S. Patent No. 6,606,248 B1 and 6,346,146 B1 (both Duselis). Although the conflicting claims are not identical, they are not patentably distinct from each other because both teach a cement composite comprising a mixture of bleached and unbleached cellulose fibers.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A *timely filed terminal disclaimer* in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

35 USC 102:

Claims 1 and 4-11 and 28 are rejected under 35 U.S.C. 102(a and e) as being anticipated by Duselis et al. '248 B1 or '146 B1.

Duselis et al. teach a composition comprising a combination or blend of bleached and unbleached cellulose fibers in amounts overlapping applicants' claims (see, for example, Duselis et al. 248 B1, col.5, lines 15-21). Duselis et al. thus anticipate applicants' claims.

35 USC 103 :

Claims 1 and 4-11 and 28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Duselis et al. ('248 B1 or '146 B1) alone or in view of Cook et al. '726 B2 and Gregerson et al. (EP 263723).

Duselis et al. teach a composition comprising a combination or blend of bleached and unbleached cellulose fibers in amounts overlapping applicants' claims (see, for example, Duselis et al. 248 B1, col.5, lines 15-21). Duselis do not necessarily teach all the types of cellulose fibers claimed by applicants for their invention. Cook et al. (hereafter Cook) teaches examples of cellulose fibers that can be used for cement fiber reinforcement includes radiata pine, spruce, redwood, and douglas fir (see col.3, lines 60-67). It would have been an obvious design choice for one of ordinary skill in the art to use a specific cellulose fiber in Duselis cement/cellulose fiber composition because they are known for that use in the art according to Cook.

Also, Gregerson et al. (hereafter Gregerson) teaches adding cellulose fiber such as bleached or unbleached cellulose fiber to hydraulic binder or cement. Gregerson et

Art Unit: 1793

al. teach conventional cellulose fiber sizes for length are 1.0 mm for bleached cellulose fibers and less than 4 mm for unbleached cellulose fibers (see p.6 under Fibres). This is thus a conventional size range for cellulose fibers and it would have been an obvious design choice for one of ordinary skill in the art to use this cellulose fiber size in cement. Note that this secondary Gregerson was necessary because Duselis did not explicitly teach what fiber sizes he uses for his invention. Nevertheless, it would have been obvious to one of ordinary skill in the art (according to Gregerson) to use conventionally known fiber sizes for cellulose fiber in the Duselis cement/cellulose fiber composition.

Response to Applicants Arguments of 2/6/07 (in 4/9/08 Non-Final Rejection):

ODP

The examiner maintains the ODP rejection is proper and Duselis does not limit his range of amounts for his mixture. Duselis '248 B1 teaches cellulose fibers may be bleached, unbleached, or mixtures thereof. Again, Duselis is not limited to any particular ranges but is inclusive of any mixture between bleached fibers and unbleached fibers. This reference is good for all that it teaches and it is inclusive of applicants' claimed mixture.

The applicants argue Kaplan case law noting that the examiner's rejection over Duselis rejection falls under a "dominating" effect in accordance with his case law. The examiner disagrees. A reference is good for all that it teaches and Duselis is inclusive of any mixture of bleached and unbleached cellulose fibers. The applicants are essentially asking the examiner to ignore the teaching of this reference (mixtures of bleached and unbleached cellulose fibers) which is inclusive of mixtures and he can not and will not do so.

Duselis 102 and 103:

The applicants acknowledge that Duselis teaches a mixture or combination of bleached and unbleached fibers yet do not teach their specific range of amounts. In rebuttal, the examiner maintains that Duselis is not limited to particular ranges of amounts and teaches any mixtures of bleached and unbleached fibers including from zero to 100 wt% for each cellulose fiber (bleached or unbleached) component under "and mixtures thereof" as taught by Duselis.

Art Unit: 1793

Response to Applicants Arguments of 7/9/07 (in 8/30/07 Final Rejection):

The applicants repeat arguments previously presented and the examiner has pasted the same response as noted above for further review and response to these reiterations.

The applicants also argue that the benefits of bleached and unbleached fibers were not recognized at the time of filing of their ODP references. This is not relevant especially since these ODP references sufficiently teach applicants' invention and the prima facie case of obviousness has been met. Applicants also argue that bleached fibers are not required. The point is not relevant since the references teaches it can be used and thus applicants cannot ignore the totality of the teaching of the reference.

The Duselis et al. '248 B1 reference teaches the cellulose fibers may be bleached, unbleached, partially bleached or mixtures thereof. (col.5, lines 16-17). The examiner maintains that Duselis is not limited to particular ranges of amounts and teaches any mixtures of bleached and unbleached fibers including from zero to 100 wt% for each cellulose fiber (bleached or unbleached) component under "and mixtures thereof" as taught by Duselis. This is and remains the examiner's position regarding the prior art meaning of "or mixtures thereof" as being for each component (bleached fiber and unbleached fiber) both being in the range of 0 to 100 wt%.

The applicants next argue *dry formulation* versus they allege in their own invention is total cellulose fibers. A review of applicants' claim 1 also reveals that it is a dry formulation as there is no *water* in claim 1. Applicants' own total amounts of bleached and unbleached cellulose fibers is directed to their own dry formulation so this argument is not convincing.

Response to Applicants' Arguments from 10/31/07 RCE:

Many of the applicants' arguments repeat earlier arguments. The response to them thus can be found above in the examiner's previous responses. The applicants have now added a new limitation to claim 1 that the MOR of their claimed cement composite of between about 5-25 wt% bleached and remainder unbleached cellulose fibers has a modulus of rupture "substantially equal to or greater than the MOR of an equivalent composite material reinforced with unbleached premium grade cellulose fibers. In rebuttal, as stated numerous times before, the Duselis patents teach a composite comprising a mixture of bleached and unbleached fibers. Duselis has been given the broadest interpretation from their disclosure and ~~both~~ the examiner takes that

Duselis does not limit his amount or mixture of bleached and unbleached fibers. They can each be in any amount from 0 to 100 wt%. Thus, they would overlap applicants amounts and the same overlapping composition would have been expected to have ^{the} ~~the~~ same properties such as modulus of rupture.

The examiner, contrary to applicants' comments, does not *take issue* with the benefits of bleached and unbleached fibers and never said so. He simply maintains that his interpretation of Duselis is this prior art teaches an overlapping cement cellulose fiber composite. He does not limit the amounts of unbleached and bleached cellulose fibers and thus can be any amount each from 0 to 100 wt% of cement composite. Thus, the amounts of the prior art and applicants' claimed composite overlap giving the same properties.

131 Declaration-Mr. Caidan Luo:

The applicants' submitted 131 provides no experimental evidence or data but only the *opinion* of the instant inventor who is an expert in this field and who is not a neutral observer in the outcome of the instant prosecution. The mechanical properties and *benefits* Mr. Luo alleges to be unexpected are not unexpected since Duselis teaches their cement composite containing bleached and unbleached cellulose fibers in overlapping amounts. Applicants disagree but this has been the point of contention from the beginning of prosecution. The examiner maintains that the references overlap for the reasons stated above and numerous other times in his responses to applicants. The Duselis references teach a mixture of bleached and unbleached cellulose fibers in a cement composite and do not limit their mixture of cellulose fibers to any amount.

Art Unit: 1793

The applicants argue that address Duselis does not address the same solution (or intended use). In rebuttal, the prior art does not have to do so. The new use of a known composition is not a patentable distinction.

The applicants argue the secondary references as primary references and do not address the combination rejection which is improper. The applicants are twisting the examiner's position to obfuscate the record and not addressing the proper combination of references in his rejection. Please refer back to the motivations as to why he combines the secondary references. He does not rely on the secondary reference as a primary reference. In response to applicant's arguments against the references individually, one cannot show nonobviousness by attacking references individually where the rejections are based on combinations of references. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981); *In re Merck & Co.*, 800 F.2d 1091, 231 USPQ 375 (Fed. Cir. 1986).

The applicants have asked for further clarification regarding his position. In rebuttal, he respectfully refuses such a request. He has made his position very clear throughout prosecution that he has interpreted Duselis as not limiting his amounts of components of bleached and unbleached cellulose fibers. Applicants always have recourse to appeal and agreement between examiner and applicants is not mandatory. Applicants have not yet exercised their option of immediately moving to the Board of Appeals and not filing any further continuations if they are certain that his position is in error. They have yet to do so. The examiner's position has not changed from the

Art Unit: 1793

beginning and is unchanged in light of further argumentation. He maintains it is proper for the reasons above and in previous office actions.

The applicants response and arguments were again considered and not found persuasive for the reasons in the previous office actions and those set forth above. The finality of this office action is now proper.

Potential Requests for an After Final Rejection Interview:

Applicants are referred to MPEP 713.09 regarding after final rejection interview requests. It is the examiner's position that *any* requests for after final interviews must be presented in writing (be specific as to exactly what is to be discussed and not generalities; submit form PTO 413 A (found on PTO website) which is the official PTO applicant initiated interview request form in advance of any telephone request). This interview may only be granted if the examiner is convinced that disposal or clarification for appeal may be accomplished with only nominal further consideration. Interviews to merely restate arguments of record or discuss new limitations which would require more than nominal reconsideration or new search will be denied. See also MPEP 714.03.

This is an RCE of applicant's earlier Application No. 10/753,089. All claims are drawn to the same invention claimed in the earlier application and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the earlier application. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action in this case. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 1793

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no, however, event will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Paul Marcantoni whose telephone number is 571-272-1373. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
